

Your Legend Boat Warranty & Equipment Guide

A practical map of which warranty applies and where each claim starts.

One package, several warranties

Legend covers the boat and qualifying factory-installed equipment. Mercury, ShoreLand'r, Minn Kota, Humminbird, Garmin and other suppliers cover their own products. **The exact model-year warranty and serial-number record control.**

Your package

Owner	_____	Boat model / year	_____
Hull identification number	_____	Delivery date	_____
Motor model / serial	_____	Trailer VIN	_____

Equipment on this boat

- | | | |
|---|---|--|
| ☐ All-welded V-hull | ☐ R-Series / riveted | ☐ Pontoon |
| ☐ Mercury FourStroke | ☐ Mercury Pro XS | ☐ Mercury Verado |
| ☐ Minn Kota | ☐ On-board charger | ☐ Humminbird |
| ☐ Garmin | ☐ Canvas / bimini | ☐ ShoreLand'r trailer |
| ☐ Stereo / audio | | |

Start here: which warranty handles the claim?

Item	Primary provider	Coverage at a glance	First step
All-welded boat	Legend	Lifetime hull leak and floor protection; 6-year WOWranty.	Bring proof of purchase and HIN to a Legend dealer.
R-Series / riveted	Legend	Lifetime main seams; 10-year hull components; 6-year WOWranty.	Bring proof of purchase and HIN to a Legend dealer.
Current pontoon	Legend	5 10 Lifetime factory program.	HBW confirms the model-year terms.
Mercury outboard	Mercury	Generally 3-year pleasure-use limited and corrosion coverage.	HBW checks registration by serial number.
ShoreLand'r trailer	ShoreLand'r	1-year basic; 5-year fabricated parts and frame.	Record VIN, purchase date and problem.
Minn Kota / electronics	Maker or Legend	Brand, model and factory-installation dependent.	Photograph the serial label before removal.

Keep: bill of sale, registration confirmations, HIN, product serial numbers, accessory receipts and maintenance records.

BOAT COVERAGE

Legend coverage at a glance

The written model-year warranty controls

Current web summaries are helpful, but the boat's **HIN, delivery date and written warranty** decide the actual term.

Family and fishing boats

Boat / coverage	Published term	Plain-language summary
All-welded: Leakproof for Life	Original-owner lifetime	Qualifying leaks through the hull structure caused by factory defects. Impact, corrosion, misuse and trailer failures are excluded.
All-welded: floor	Lifetime against rot	Qualifying treated marine-grade plywood. Labour and finish coverage may be shorter.
R-Series: main riveted seams	Original-owner lifetime	Qualifying leakage from factory defects. Impact and improper trailer support are excluded.
R-Series: other hull items	10 years	Current overview states additional hull-component coverage. Older terms prorated after year 2.
Second-owner protection	Up to 10 years	May transfer once, subject to model eligibility, inspection, timing, fee and Legend approval.

Model-specific boats: Older Ultralite / utility and legacy fibreglass models have their own structural schedules. HBW checks the HIN before quoting coverage.

Current pontoons: 5 | 10 | Lifetime

Coverage	Published term	What Legend currently summarizes
Structure	Lifetime parts; up to 10 years labour	Pontoon tubes, cross-channels, seat frames, motor mounts, structural railing and wood decking.
Canvas and bimini frames	10 years parts and labour	Factory material or manufacturing defects in standard covers and bimini tops.
Vinyl and upholstery	10 years parts and labour	Specified factory defects, including abnormal fading, peeling, cracking or loss of strength under normal use.
Tech, electronics and fibreglass	5 years	Factory-installed navigation, audio, helm electronics, wiring, lighting and structural fibreglass.

The 6-year WOWranty

Covers most qualifying non-structural components that Legend manufactured or installed when a factory defect causes failure. **It is not six years on every item in the package.**

- **Usually built in:** floor finishes; seats and furniture; switches, breakers and console parts.
- Boat systems: lights, horn, bilge and livewell pumps; qualifying hardware and fixtures.

- **Usually separate:** Mercury motor and drivetrain; trailer, tires and wear items.
- Minn Kota, Humminbird, Garmin, stereo, batteries and dealer- or owner-added accessories.

Family/fishing canvas: current pages show model-dependent ProTech coverage, commonly 3 years on qualifying material plus 1 year on stitching, zippers, seams and top components; current XT pages publish 5 years plus 1 year. HBW confirms the exact model.

OWNERSHIP AND CLAIMS

Register it, document it, protect it

Registration and transfer

- **New boat:** the selling dealer registers the HIN. The older manual calls for submission within 30 days. Keep the confirmation.
- If no confirmation arrives, ask HBW to verify the Legend hull record.
- **Second owner:** qualifying coverage may transfer once, usually with an application within 30 days, dealer inspection, photos, fee and Legend approval.
- The 2020 manual listed a \$500 fee plus tax and a \$125 inspection credit. Confirm the current fee before quoting it.

How to start a Legend claim

1	Stop using the boat if the issue affects safety or continued use could cause more damage.
2	Photograph the defect, serial labels and overall condition before disassembly .
3	Bring the bill of sale, HIN and maintenance records to an authorized Legend dealer.
4	Let the dealer obtain written authorization from Legend before warranty work starts.
5	Keep the work order and Legend's decision with the boat records.

What factory-defect coverage usually excludes

- **Use:** impact, accident, misuse, racing, rental/commercial use, overpowering and unauthorized modifications or repairs.
- **Care:** corrosion, electrolysis, incorrect anodes, incompatible cleaners, mold, mildew, heat, moisture and ordinary cosmetic wear.
- **Eligibility:** salvage/total-loss boats, non-authorized initial sale and certain outside engine installations.
- **Trailer/rigging:** poor support, wrong bunk/roller adjustment, loading/lifting damage, motor height, prop selection and performance claims.
- **Surfaces:** paint, windows, rain leakage through enclosures, trailering/winter-storage canvas damage, stains, shrinkage and fading.
- **Wear:** bulbs, tires, consumables, routine maintenance and normal deterioration.

Care points worth remembering

Remove the mooring cover before towing. Stow the bimini for travel above 24 km/h (15 mph). Roll enclosure windows correctly. Follow the approved cleaning instructions and use the correct anodes.

Usually not reimbursed: transportation, haul-out, launch, de-rigging, re-rigging, phone, rental, travel, meals, lost time and similar incidental costs. Warranty approval or denial remains the manufacturer's decision.

MERCURY OUTBOARDS

Mercury warranty and claim route

HBW verifies the engine by serial number

Before promising coverage, HBW checks the **registered owner, use type, start date, remaining term** and any protection plan in Mercury's dealer system.

Published coverage

Product	Pleasure-use limited	Corrosion	Important note
FourStroke / Pro XS / Verado / Jet	3 years	3 years	Current U.S. and Canada chart for eligible product sold after August 26, 2024.
SeaPro FourStroke	3 years	3 years	Commercial-use terms differ. Intended use must be correct at registration.
Avator propulsion unit	3 years	3 years	Avator batteries and charging systems publish 2-year pleasure-use coverage.
Mercury controls and rigging	May match engine	None	May apply when supplied and installed with the qualifying engine package; purchased parts can be shorter.

Registration and maintenance

- Coverage is not effective until the product is properly registered.
- The period starts at first retail sale or first use, whichever comes first.
- Keep proof of required maintenance; Mercury may ask for records.
- Pleasure-use coverage can normally transfer after proper re-registration.
- The customer normally pays transport or travel to an authorized facility.
- Unauthorized repairs or incorrect registration can affect coverage.

Extended coverage is a separate contract

Eligible motors may have Mercury Product Protection or another written plan. It is **not an automatic extension** of the standard warranty. The signed contract controls the term, covered components, deductible and transfer rules.

Starting a Mercury claim

	Action
1	Record the engine model, serial number, hours and exact warning or symptom.
2	Stop operating if there is overheating, low oil pressure, loss of cooling flow, severe power loss or an unidentified continuing alarm.
3	Submit a service request at hbw.wiki/service and include photos or display messages.
4	Do not authorize outside disassembly or repair before the warranty route is confirmed.

Written Mercury terms and provincial consumer rights control. A goodwill repair, recall or extension on another motor does not automatically change this motor's coverage.

MERCURY WARNING REFERENCE

Warning horns and Guardian

The exact engine manual always wins

Horn patterns and Guardian responses vary by engine family, horsepower, model year, gauge and SmartCraft equipment. **Read the displayed message and use the manual for that exact motor.**

Current outboard guidance

Warning / condition	Older handout reference	Safer current action
Start-up self-test	One beep at key-on.	A brief self-test may be normal. If the usual test does not occur, check the exact manual before operating.
Water in fuel	Four beeps every 2 minutes.	Only applies where a sensor is fitted. Reduce power and follow the manual; do not open a hot or pressurized fuel system.
Cooling / overheat	Continuous; Guardian may limit power.	Reduce throttle, shift to neutral when safe, and stop if cooling flow is absent or the warning continues.
Overspeed	Continuous warning and speed limit.	Reduce throttle. Prop pitch, motor height, trim, ventilation or drivetrain faults may be involved.
Sensor / voltage	Continuous or intermittent.	Read the SmartCraft or VesselView message. Do not assume the tone identifies the failed sensor.
Low oil reserve / pump	Four-beep or continuous.	Legacy oil-injected 2-strokes only, not a current FourStroke reservoir. Stop and use that motor's manual.

Legacy MerCruiser / EFI appendix for older packages only

Sound	Legacy examples	Legacy response
One beep at key-up	Normal	System test.
Six beeps	MAP, MAT, TPS or flash checksum	Engine may run, but service is required.
Three beeps / 4 min	Battery voltage, EST, injector, coolant sensor or IAC	Hard starting, rough running or stalling may occur. Service is required.
Intermittent	Fuel pump, main relay or ECM reference voltage	Engine may not start or may stall. Service is required.
Continuous	Overheat or low oil pressure	Guardian may limit power. Stop; check cooling intake or oil level and investigate.
Continuous	Voltage below 10 V / above 16 V; coolant-sensor failure	Power may be limited; charging or overheat protection may be compromised.
Continuous	Engine speed limiter	Older table listed 6,200 / 6,350 rpm. These are model-specific and must not be applied elsewhere.

Do not diagnose by sound alone. A repeated beep means the engine needs attention; the display message, fault history and model-specific service information identify the cause.

MINN KOTA

Trolling-motor warranty and service

Keep the receipt and serial-label photo

Those two records usually determine whether Minn Kota can verify the model, manufacturing date and coverage.

Product	Current published term	Important detail
Most freshwater trolling motors	2 years; limited-lifetime composite shaft	Original retail owner. Misuse, damage, saltwater use on freshwater models and normal wear are excluded.
Select QUEST / Advanced GPS	2 years; possible 3rd year after registration	Model-specific. PowerDrive, Kayak Terrova and certain other models are excluded from the extra year.
Ultrex manufactured 2016–2023	3 years	Use the serial number and proof of purchase to establish the exact model and date.
Vantage / E-Drive	2 years	Entire product, subject to the written model warranty.
On-board chargers / maintainers	3 years	Entire product.
i-Pilot / i-Pilot Link	2 years	Entire accessory.
CoPilot / general accessories	1 year	The old HBW handout listed 2 years for CoPilot; the current summary lists 1 year.
DeckHand anchor winch	2 years	Entire product.
Factory-reconditioned motor	1 year	Not eligible for the extra registered year.

How Minn Kota service works

- Register an eligible Advanced GPS motor promptly if an extra year is offered in Canada.
- Update Advanced GPS and i-Pilot software before assuming a control issue is failed hardware.
- Photograph the serial label before removing the motor, charger or accessory.
- Minn Kota uses authorized service providers in Canada and the United States.
- Removal, reinstallation, haul-out and transportation are normally the owner's cost.
- **Support:** 1-800-227-6433. Use the current authorized-service locator.

Canadian terms can differ

HBW confirms the Canadian warranty for the exact model before promising a third year or a particular service path.

TRAILER, ELECTRONICS AND CLAIM FILE

The rest of the package

ShoreLand'r trailer

Coverage	Published term	Important limits
Basic warranty	1 year	Qualifying defects in supplied trailer parts and accessories. Tires, alignment, finish and normal wear are excluded.
Fabricated parts / frame	5 years	Qualifying frame, axle, tongue, winch and bunk-support parts. Original owner; alteration, corrosion, abuse and poor adjustment excluded.

Electronics and accessories

Product / category	Published term	Claim note
Humminbird HELIX 5 / 7	1 year	Product-dependent coverage; accessories and cartography also publish 1 year.
Humminbird HELIX 8 / 9 / 10 / 12 / 15, APEX / SOLIX	2 years	Select XPLORE models may receive an optional third year after registration.
Garmin qualifying marine products	Often 2 years	Products outside Garmin's listed marine policy may have a 1-year consumer warranty.
Factory-installed current pontoon electronics	Legend publishes 5 years	May be broader than the component maker's base term. Confirm factory installation.
Canvas / tops	Model-year dependent	Current pontoons publish 10 years; family/fishing material and component terms vary. Trailering, storage and weathering exclusions apply.
Stereo / gauges / batteries / dealer-added items	Product dependent	Factory pontoon tech may be under Legend; otherwise use the component maker's receipt, serial and written term.

Before an electronics claim: photograph the screen/message, wiring and serial label; record when the issue occurs and connected accessories; do not cut cables or remove a transducer until the claim route is confirmed. Diagnosis, shipping, removal and reinstallation may not be covered.

Bring the right information

Boat HIN	_____	Mercury model / serial	_____
Trailer VIN	_____	Minn Kota model / serial	_____
Electronics / charger serials	_____	Date problem first appeared	_____

Attach: bill of sale, registration confirmations, overall and close-up photos, serial-label photos, maintenance records, alarm/screen message and protection-plan contract if applicable.
