

HBW OWNER RESOURCE

Mercury Serial Number & Service Request Prep Sheet

Bring the right facts the first time. It helps us diagnose the motor, not the story around it.

BOAT MAKE / MODEL / YEAR

ENGINE MODEL / HP

SERIAL NUMBER

ENGINE HOURS

BEST LAUNCH / SERVICE DATE

YOUR NAME

Describe the symptom

- ☐ What exactly happens? Use the display wording or alarm pattern, not a guess.
- ☐ When does it happen: cold start, idle, acceleration, cruise, trim or reverse?
- ☐ Is it constant or intermittent? Record speed, rpm, load and water conditions.
- ☐ What changed just before it started: fuel, service, impact, storage or battery work?
- ☐ Did the engine overheat, lose cooling flow, smoke, leak or strike anything?

Photos and safe video

- ☐ Clear transom-bracket serial label and full engine installation.
- ☐ Dash, SmartCraft message or warning-light display.
- ☐ Propeller and gearcase after any impact or fishing-line contact.
- ☐ Any leak, damaged hose, loose fitting, corrosion or visible wiring concern.
- ☐ Video only from a safe, stationary position. Don't film while operating the boat.

Fuel and recent history

- ☐ Fuel grade, ethanol label, purchase date, location and receipt if available.
- ☐ How long the fuel sat, and whether fresh fuel and stabilizer were used.
- ☐ Last engine oil, gear lube, filters, plugs, impeller and winterization service.
- ☐ Any recent battery replacement, jump start, rigging work or electronics install.
- ☐ Previous alarms, overheating, collision, submersion or contaminated fuel.

Stop and don't restart

- Fire, smoke or a fuel leak.
- Loss of steering or control.
- Overheat warning, oil-pressure warning or a serious SmartCraft instruction.
- Propeller or gearcase impact, especially with vibration or leaking lubricant.
- A new severe noise, seized engine or water intrusion.

Move people to safety first. Use emergency services when required.

Ready to send it in?

Submit the serial number, hours, symptoms and files at hbw.wiki/service. One complete request beats several partial messages.
