

HBW OWNER RESOURCE

Mercury Repower Planning Worksheet

Good fitment starts with the boat you own, how you load it and what you want it to do.

OWNER NAME

EMAIL

PHONE

1. Boat and current engine

BOAT MAKE / MODEL / YEAR

HULL IDENTIFICATION NUMBER (OPTIONAL)

BOAT LENGTH

CAPACITY PLATE MAX HP

TYPICAL LOADED WEIGHT, IF KNOWN

CURRENT ENGINE MAKE / MODEL / HP

CURRENT ENGINE SERIAL NUMBER

CURRENT SHAFT / GEARCASE

PROPELLER

ENGINE HOURS

2. Existing rigging

CONTROLS / KEY SWITCH

GAUGES / SMARTCRAFT

STEERING SYSTEM

BATTERY / CHARGING SETUP

FUEL TANK / LINES

JACK PLATE / SETBACK / BRACKET

FITMENT NOTE

Shaft length isn't an upgrade choice. Transom height, mounting arrangement, water access, gearcase, steering and boat rating all have to agree. HBW confirms the application before finalizing a motor.

Start with live Mercury pricing

Use the quote builder for current CAD motor and rigging pricing. Bring this worksheet when you're ready to confirm fitment.

Repower Goals, Use & Photo Checklist

The right engine is the one that fits the hull and the way you actually use the boat.

BOAT MAKE / MODEL

CURRENT ENGINE SERIAL NUMBER

How the boat is used

- ☐ Typical passengers and gear.
- ☐ Maximum family / fishing / towing load.
- ☐ Rice Lake, Kawarthas, Great Lakes or other water.
- ☐ Cruising, fishing, trolling, watersports or mixed use.
- ☐ Normal speed, range and time at idle.

What should improve?

- ☐ Quieter running and easier starting.
- ☐ Hole shot or ability to carry load.
- ☐ Cruise efficiency and range.
- ☐ Top speed, trolling control or charging capacity.
- ☐ Reliability, controls, gauges or steering feel.

Photos to take

- ☐ Full stern and both transom corners.
- ☐ Capacity plate and hull identification plate.
- ☐ Current engine serial label and full side view.
- ☐ Helm, controls, key switch, gauges and steering.
- ☐ Battery area, fuel connections and rigging path.
- ☐ Jack plate, setback, bracket or swim platform.

Current performance

- ☐ Wide-open rpm and GPS speed with normal load.
- ☐ Current propeller size and material.
- ☐ Acceleration, ventilation or porpoising concern.
- ☐ Cruise rpm and speed.
- ☐ Known hull, transom, steering or fuel-system work.
- ☐ Target budget or financing preference.

FINAL CHECK BEFORE ORDERING

HBW confirms the capacity plate, shaft and transom fit, gearcase, steering, controls, gauges, fuel system, battery requirements, propeller plan and installation scope. A worksheet starts the conversation. It doesn't replace the installation assessment.
