

Legend warranty claim checklist

Keep this with your boat records. Complete the details before starting a claim.

This checklist helps identify the applicable warranty and claim route. It does not promise coverage. The exact model-year written warranty and the manufacturer's assessment control.

1 Identify the boat and ownership

Boat model / model year

Hull identification number (HIN) / delivery date

Owner / purchase date / selling dealer

- ☐ Original owner
- ☐ Subsequent owner: ask whether transfer is available or already approved.

Confirm registration, transfer requirements, any deadline or fee, and approval status for this exact boat. Keep the bill of sale and confirmation with the records.

2 Match each item to its provider

Record the model and serial number, then confirm who handles that item. Factory-installed and dealer-added equipment can follow different terms.

Mercury outboard

Model / serial:

Trailer

Make / VIN:

Trolling motor / charger

Make / model / serial:

Pump / electronics / other

Make / model / serial:

Legend warranty claim checklist

Document the issue, confirm the terms, then arrange service.

3 Ask what the written terms include

- ☐ Applicable provider, model-year terms and coverage start date
- ☐ Parts and labour: confirm each separately
- ☐ Diagnosis, removal, refitting and transport: ask what is included
- ☐ Exclusions, maintenance conditions and authorization before repairs

Questions / provider reference / written confirmation

4 Build a clear claim file

If continued use could be unsafe or cause more damage, stop using the boat. Photograph the issue before dismantling or repairing equipment.

- ☐ Overall and close-up photographs; displayed warnings or alarm messages
- ☐ When the issue started, operating conditions and any recent changes
- ☐ Bill of sale, registration, maintenance records and previous repairs

Issue description / date first noticed

5 Request service and drop off

Complete the service request at hbw.wiki/service. Boats can then be dropped off anytime, including after hours.

Drop-off is separate from work approval. HBW can diagnose, document and submit a claim; Legend or the applicable component manufacturer decides whether it is covered. Confirm the work and any charges before repairs proceed.

Service request reference / agreed work / approval record

Bring the records. Let the exact boat and written terms guide the claim.
